Unemployment in the Washington Area by County – September 2015 **19 of 22 Area Counties Posted Unemployment Rates below the National Average**

In September, Arlington County, Va., had the lowest unemployment rate in the Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Statistical Area at 2.8 percent, the U.S. Bureau of Labor Statistics reported today. Sheila Watkins, the Bureau’s regional commissioner, noted that the District of Columbia had an unemployment rate of 6.9 percent, the highest among the 22 counties that make up the metropolitan area. Prince George’s County had the second-highest rate at 5.1 percent and was the only other county in the area with a jobless rate that exceeded the 4.9-percent U.S. rate. The unemployment rate for Charles County, Md., matched that for the U.S., while the rates for the remaining 18 counties in the area ranged from 4.7 percent in Fredericksburg City, Va., to 3.0 percent in Falls Church City, Va. (See [chart 1](#) and [chart 2](#). The Technical Note at the end of this release contains the metropolitan area definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

Chart 1. Unemployment rates for the United States and counties in the Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Statistical Area, September 2015, not seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

Unemployment rates in all 22 Washington-area counties were lower in September 2015 than in September 2014. (See [table A.](#)) Nine counties had rate declines that exceeded the national decrease of 0.8 percentage point with Fredericksburg City, Va., recording the area’s largest decrease at 1.2 points. Two counties—Fairfax and Fauquier, Va.—had rate declines that matched the national decline. Over-the-year rate decreases in the remaining counties ranged from 0.6 percentage point in Prince George’s County, Md., to 0.4 point in Montgomery County, Md.

Footnotes:

(1) Data for the Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Statistical Area and its components are preliminary for the most recent month.

All 22 counties in the Washington metropolitan area had lower unemployment rates in September 2015 than two years earlier, although no county had a rate decline larger than the national decrease of 2.1 percentage points. The District of Columbia had the largest decrease in the local area at 1.7 percentage points. The area’s remaining counties had unemployment rate declines ranging from 1.5 percentage points in Manassas City, Va., to 0.6 point in Jefferson County, W.Va.

September 2015 unemployment rates for the two metropolitan divisions in the Washington-Arlington-Alexandria metropolitan area were 4.3 percent (Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va.) and 4.1 percent (Silver Spring-Frederick-Rockville, Md.). The Washington division matched the national employment rate decline of 0.8 percentage point from September 2014 to September 2015; in the Silver Spring division the rate decreased 0.4 point.

The Metropolitan Area Employment and Unemployment news release for October is scheduled to be released on Monday, December 7, 2015, at 10:00 a.m. (EDT).

Technical Note

This release presents unemployment rate data for states and counties from the Local Area Unemployment Statistics (LAUS) program, a federal-state cooperative endeavor.

Definitions. The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Methods of Estimation. The LAUS program is a hierarchy of non-survey methodologies for indirectly estimating employment and unemployment in states and local areas. Statewide data are produced through a modeling technique that uses estimates of payroll jobs from the Current Employment Statistics survey and unemployment insurance claims counts from the state workforce agencies to mitigate volatility in the direct CPS tabulations of employment and unemployment, respectively. Data for labor market areas, such as metropolitan areas and metropolitan divisions, are produced through a building block approach and adjusted proportionally to state model-based totals. Data for counties within labor market areas are produced through a disaggregation technique. A detailed description of the LAUS estimation procedures is available in chapter 4 of the BLS Handbook of Methods at www.bls.gov/opub/hom/homch4.htm.

Annual revisions. Labor force and unemployment data for prior years reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation. All substate estimates are reestimated and adjusted to add to the revised model-based estimates.

Area definitions. The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget, dated February 28, 2013. A detailed list of the geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

The **Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Statistical Area** includes the District of Columbia; Arlington, Clarke, Fairfax, Fauquier, Loudoun, Prince William, Spotsylvania, Stafford, and Warren Counties, and Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park Cities in Virginia; Calvert, Charles, Frederick, Montgomery, and Prince George's Counties in Maryland; and Jefferson County in West Virginia.

The **Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Division** includes the District of Columbia; Arlington, Clarke, Fairfax, Fauquier, Loudoun, Prince William, Spotsylvania, Stafford, and Warren Counties, and Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park Cities in Virginia; Calvert, Charles, and Prince George's Counties in Maryland; and Jefferson County in West Virginia.

The **Silver Spring-Frederick-Rockville, Md. Metropolitan Division** includes Frederick and Montgomery Counties in Maryland.
